

Extension Poles

Taking pneumatic pruning to new heights.

The Campagnola Extension Poles are suitable for use with almost the entire range of Campagnola pneumatic pruners, chainsaws, olive harvesters & hook shakers. The only exceptions being the F6 & Star 50 loppers which are fitted with their own extensions and the Star 30 models V and F.

This means pruning, sawing, harvesting and trimming can all be carried out up to 5 metres above the ground without the use of a ladder. The Telescopic aluminium poles are the most popular because of their light weight, strength and most of all, their adjustable length. This is accomplished with the aid of a fully adjustable quick release lock.

The Fixed poles are available and while they are less expensive, they do not have the advantage of being adjustable in length. Adjustable angle adaptor for varying tool position available (code AH38).

TECHNICAL SPECIFICATIONS

Fixed Extension Poles

| Code | Length (meters) | Weight (kg) |
|--------|-----------------|-------------|
| EXT0.5 | 0.5m | 0.7kg |
| EXT1.0 | 1.0m | 0.8kg |
| EXT1.5 | 1.5m | 1.0kg |
| EXT2.0 | 2.0m | 1.1kg |
| EXT2.5 | 2.5m | 1.3kg |
| EXT3.0 | 3.0m | 1.4kg |

Telescopic Extension Poles

| Code | Length (metres) | Weight (kg) |
|-------|-----------------|-------------|
| AH-T1 | 1.0 - 1.5m | 1.1kg |
