M3 pole pruner

Pneumatic chain pruner to be used in conjunction with Campagnola brand extension poles

Eclipse Enterprises proudly welcomes back the updated M3 pneumatic chainsaw. This no-frills package includes a pole adaptor with an offset of 30 degrees suitable for direct coupling with a Campagnola extension pole. All guards and handles have been removed to allow for greater access into heavy canopies.

The M3 pneumatic chainsaw features a gravity fed automatic bar and chain oiler. This makes it ideal for use on one of the Campagnola patented Telescopic or Fixed Extension poles as the chain will be continuously lubricated without unnecessary stoppages.

The M3 weighs only 1.8kg and will cut up to 150mm diameter branches.

It comes in 8 inch bar and is fitted with a 1/4" chain for smoother cuts where quicker healing is required.

Running Requirements

The M3 draws 400 litres of air per minute so a 24 cfm compressor would be required for continuous use, though an 18 cfm will suffice for intermittent use. For lengths up to 50 metres, a hose with an inside diameter of no less than 8mm is recommended.
